DETAILED ACTION

Claims 1-23 are presented for examination.

The Preliminary Amendment filed October 5, 1995 and the Information Disclosure Statement filed October 26, 1995 have been received and entered.

Election/Restriction

Restriction to one of the following inventions is required under 35 U.S.C. 121:

Group I. Claims 1-11 and 21-23, drawn to a biocompatible, supplemented tissue sealant composition, classified in Class 424, subclass 94.64, for example.

Group II. Claims 12-20, drawn to an antibody delivery system, classified in Class 424, subclass 130.1+, for example.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (M.P.E.P. § 806.05(h)). In the instant case, the product claimed, i.e., the biocompatible, supplemented tissue sealant composition, can be used in a materially different process such as in an adhesive for sealing wounds.

The inventions are independent and distinct, each from the other. They have acquired a separate status in the art as a separate subject for inventive effect and require independent

searches (as indicated by the different classification). The search for each of the inventions is not co-extensive particularly with regard to the literature search. Further, a reference which would anticipate the invention of one group would not necessarily anticipate or even make obvious the other group.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 C.F.R. § 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 C.F.R. § 1.48(b) and by the fee required under 37 C.F.R. § 1.17(h).

Conclusion

No claim is allowed.

The references cited, but not relied upon are considered pertinent to applicant's disclosure.
